

Fig. 1

FIG. 1 is a schematic diagram of a satellite communication system. The system includes a satellite S and three ground stations. The first ground station (1) contains components 11 and 12. The second ground station (3) contains components 31 and 32. The third ground station (2) is a mobile station containing component 21. Uplink channels P1, P2, C1, C2, U1, and U2 connect the ground stations to the satellite.
